Canine Puppy Wellness Program

The following guidelines are our general recommendations for preventative health for your dog. Because each animal is unique, we will tailor your pet's health program as needed for optimal care.

8 weeks:	Physical examination
	DHPP combination vaccine - canine distemper, hepatitis virus, parvo and parainfluenza
	Begin heartworm preventative
	Deworming – we recommend bringing in a stool sample at this visit
12 weeks:	Physical examination
	2nd DHPP vaccine with Leptospirosis added
	Manual hip dysplasia evaluation
16 weeks:	Physical examination
	3rd DHPP vaccine with leptospirosis added
	Bordatella vaccination if going to a boarding facility, puppy classes, or other high risk environments
	Radiographic hip dysplasia evaluation
	Juvenile Pubic Symphysiodesis (JPS) surgery if necessary
	Spay or Castration at this time if JPS is performed
20 weeks:	Additional parvo vaccinations for breeds such as Dobermans, Pit Bulls and Rottweilers may be needed if not vaccinated as recommended
6 months:	Rabies vaccination (booster required in 1 year)
	Spay or Castration
	Microchip implantation
