

**Crater Animal Clinic, LLC**  
**Fresh-Cooled Semen Breeding Package Agreement**

Owner/Agent \_\_\_\_\_ Date \_\_\_\_\_

Patient \_\_\_\_\_ Breed \_\_\_\_\_ Age \_\_\_\_\_

By signing below I certify that I am the owner/agent/leasee of the above identified animal. I also authorize Crater Animal Clinic to perform all procedures necessary to evaluate, treat and perform reproductive procedures on this animal as determined by the attending veterinarian. I also authorize Crater Animal Clinic to perform any reasonable emergency medical procedures that are determined necessary by the attending veterinarian. All animals boarding at Crater Animal Clinic must have current Rhinopneumonitis/Influenza (within 90 days) and tetanus toxoid (within one year) vaccinations. If not they will be updated by the clinic and the charges are the responsibility of the undersigned.

I also accept that this agreement is contingent on the above mare having an acceptable reproductive history (as determined by attending veterinarian) and no evidence of infertility on the initial reproductive exam. The above mare must also have a recent normal uterine culture and cytology result prior to the breeding process, unless deemed to be un-necessary by the attending veterinarian. One heat cycle under this agreement is determined to be from ovulation to ovulation. Covered in this package are all reproductive procedures deemed necessary including palpations/ultrasounds, inseminations, hormone injections including oxytocin, lutalyse, human chorionic gonadotropin and deslorelin. Also included is the 14-16 day pregnancy exam.

I also agree that the package payment is my responsibility even if the semen shipment does not arrive as scheduled. I also realize that equine fertility rates are not 100% so there is no implied guarantee that my mare will become pregnant from this breeding. We also require copies of your breeding contract and contact numbers for the stallion owners/service and semen collection days.

The cost of this package for one heat cycle is \$375.00. In addition to this fee will be boarding at \$22.00 per day. By prior arrangement you may be allowed to keep your mare at home and haul-in for the above procedures, but this will only be possible if you can adjust your schedule to fit into the clinic daily schedule.

Additional costs not included in this package may be deemed necessary to optimize breeding success, including but not limited to uterine lavages and sedation for certain mares. These additional costs will be discussed with and approved by you prior to being implemented. It is understood that some mares will require sedation to perform certain reproductive procedures and if you are not willing to pay for this service the mare will not be eligible for this packaged service.

**Policy for Payment**

The package fee is due at time of admission. I, the owner/agent/leasee of the above animal, agree to pay all fees associated with this breeding service and emergencies. I also understand that breeding is an elective procedure. I also agree to pay all fees due prior to the release of this mare from Crater Animal Clinic. I also agree to pay all fees incurred if any action to collect these fees is undertaken by Crater Animal Clinic including debt collection services and attorney fees.

**Authorization/Release**

I agree to all of the above statements. I also realize that additional costs may be incurred which will be authorized by me (unless unavailable) in advance and I agree to pay these additional fees.
