Feline Kitten Wellness Program

The following guidelines are our general recommendations for preventative health for your kitten. Because each animal is unique, we will tailor your kitten's health program as needed for optimal care. A physical exam at each visit is very important because our pet's age in 6-9 months what we do in 14-16 years. This will give you time to discuss any issues about your kitten's health, behavior, nutrition and diet in this extremely important developmental period.

8 weeks: (2 months)	Wellness examination DRCC vaccination: This is a combination vaccine including Feline Distemper Virus, Rhinotracheitis virus, Calicivirus, and Chlamydiosis Feline Leukemia (FeLV)/Feline Immunodeficiency Virus (FIV) test - We want to be sure your kitten tests negative before giving the 1st FeLV vaccination Deworming: We recommend bringing in a stool sample for analysis at this time so we can be sure to use the proper dewormer
12 weeks: (3 months)	Wellness examination 2 nd DRCC vaccination Feline leukemia (FeLV) vaccination 2 nd deworming
16 weeks: (4 months)	Physical examination 3 rd DRCC vaccination 2 nd Feline leukemia vaccination
6 months:	Rabies vaccination (booster required in 1 year) Spay or castration surgery Microchip insertion
